

- when water matters

Kongsberg Esco aims to further reinforce their strong position within water and waste water systems, providing innovative products and tailor-made systems.

KONGSBERG PLANT

Kongsberg Esco was founded in Oslo as early as 1877, under the name E. Sunde & Co. (from which the name Esco was derived). The company quickly developed a wide range of products related to water, waste water, industry, heating, ventilation and sanitation. In 1964, the company moved to Kongsberg and, since the relocation, has further developed its expertise and market position, principally with regards water supply.

NORWEGIAN QUALITY MANUFACTURER

Kongsberg Esco is the only Norwegian manufacturer of valves and fittings for water supply. The company enjoys a strong position in Norway and Sweden, and is experiencing an increase in exports.

Service and customer focus

KONGSBERG ESCO HAS A NUMBER OF EXPERIENCED SALES CONSULTANTS and a professional customer service department which helps the company ensure reliable and quality deliveries.

GOOD SERVICE is a decisive factor. Kongsberg Esco maintains a constant focus on sustaining a high level of service for customers. Long-term relationship building and trust are essential to achieve a position as a preferred partner.

The right product at the right time

5

KONGSBERG ESCO GIVES PRIORITY TO GOOD LOGISTICS and satisfied, loyal customers and end users. The company has a significant stock of finished goods at Kongsberg.

QUALITY PRODUCTS in combination with tailor-made pre-assembly of valves and fittings for manhole provide optimal conditions for safe and efficient operations and functionality.

QUALITY REQUIREMENTS established by customers are communicated to our subcontractors to ensure high product quality throughout. Our goal is for every customer to regard Kongsberg Esco as the best supplier within our branch.

PROFESSIONAL PARTNERS provide logistic and transport services and allow us to ensure efficient exploitation and minimal impact on the environment.

Advanced and innovative technology

6

KONGSBERG ESCO FOCUSES ON PRODUCT DEVELOPMENT which adapts to the constant innovations within the market for water and waste water. The company has more than 15 years' experience of 3D tools for product development.

TECHNOLOGY

The company makes use of modern technology and robotic machining centres to achieve quality and precision products. A fully modern epoxy plant ensures the quality of surface treatment pursuant to the strict requirements established by GSK.

A COMPETITIVE EDGE FOR THE FUTURE is achieved by means of improving and developing our products.

Products from Kongsberg Esco
